

Zurich Flood Resilience Programme

Key Highlights – Nepal

20 June 2016

What the Nepal team is doing

- Technology innovation – from real-time flood EWS to forecasting-based EWS
- Strengthening government capacity – e.g. installing automatic meteorology stations and organizing training
- Building community resilience – e.g. building safe shelters, resilient livelihoods

Key achievements

- Saving Lives and Properties – no loss of human life in 2014
- Community is prepared for flood – drill is becoming part of life for the communities
- Influencing policy and practice – drill is becoming regular practice of government

Thank You
